

How to setup the Web VPN Service for Windows 7 and Windows Server 2008 R2

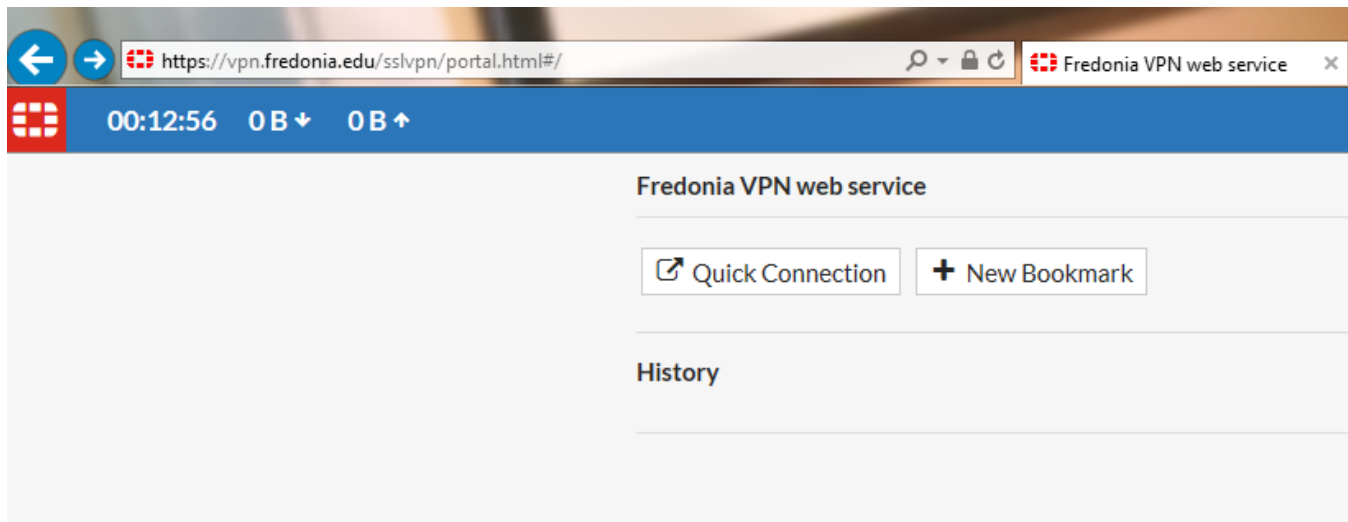

To log into the secure Fredonia Web VPN Service

1. Using the web browser on your computer, browse to the URL <https://vpn.fredonia.edu>.

2. Enter your information into the appropriate fields.

3. Select Login. You will be redirected to the Fredonia SSL VPN web portal home page.

4. Select New Bookmark and be sure to select RDP to create a new Remote Desktop Bookmark.

5. In the Name field, type what you want to name the connection

6. In the Host field, type the Fully Qualified Domain Name (FQDN) of the RDP host. The RDP host is the computer your are trying to connect to remotely.

NOTE: Directions to find the FQDN can be found [here](#).

7. In the Username and Password fields, type your Username (e.g. ad\Service I.D.) and password. You must have a user account on the remote computer to log in.

8. Click Save

9. To launch the VPN RDP session go back to the Fredonia SSL VPN web portal home page and select your desired bookmark.

Support:

If you have any questions or need further assistance, please contact the ITS Service Center that can be contacted through email at ITServicecenter@fredonia.edu, [Tracker](#), phone, or by a visit to the ITS Service Center office. The office is located at W203 Thompson, on the 2nd Floor. Phone: (716) 673-3407.
