

# Drupal: Add an Accordion

The Accordion section can be used on any basic page in Drupal. Accordion(s) will always follow after the Body content.

Example of an Accordion:

The screenshot shows a vertical list of four accordion items. The first item, 'Commencement', is in a blue bar with a green plus sign on the right. The second item, 'Digital Measures', is in a green bar with a blue minus sign on the right. Below this bar, the text 'Digital Measures Activity Insight (DMAI) links' is displayed, followed by two underlined links: 'DMAI LOGIN FOR DIGITAL MEASURES ACTIVITY INSIGHT (DMAI)' and 'DMAI HELP WITH DIGITAL MEASURES ACTIVITY INSIGHT (DMAI)'. The third item, 'e-Services', is in a blue bar with a green plus sign on the right. The fourth item, 'Facilities', is in a blue bar with a green plus sign on the right.

Step-by-step guide to create an Accordion:

1. In the Accordion section of the page, click the **Add another item** button.

The screenshot shows a light gray rectangular area containing the text 'Accordions'. Below this area is a smaller, light gray rectangular button with the text 'Add another item'.

2. Add a **Clickable Title**. This is the text that will appear on the collapsed accordion. Add your content into the **Text** field. The Text will be hidden until the visitor clicks on the Clickable Title.
