

Drupal: Story widget

All page widgets appear after the Body and any Accordions.

Example of a Story widget:

Pre-prepared stories that profile alumni and students.

Student Stories

"The VANM department gave me the skills I needed for the career I love. Thanks to Fredonia, I'm now a Scenic Artist at MAD Creative Fabrication and living in Florida!"

Megan designs and builds scenery and props for theme parks like Disney and Universal Studios.

Class of 2016

To create a New Story:

To request a new Story, visit the Google Form at <https://docs.google.com/forms/d/e/1FAIpQLSeh78knT4Bx3OwVcpiFPQUc2F3Pk4VehWz553ZgypK8Cidn2A/viewform>

To add a Widget:

1. After the Body and Accordions fields, in the **Basic Page Widgets** section of a page, select a **Widget Type** then click **Add new Widget**.

Basic Page Widgets

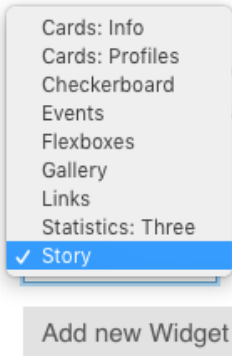

No Widgets added yet. Select a Widget type and press the button below to add one.

Widget type

Cards: Info ▼

Add new Widget

2. Choose **Story** from the Widget type menu:

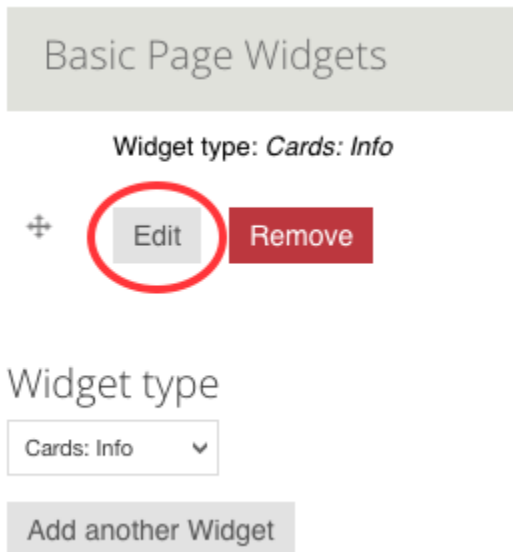

Widgets

et. Select a Widget type and press the button below to add one.

To edit or remove a Widget

If a web page has an existing Widget, scroll down to the **Basic Page Widgets** section, and click the **Edit** button to change a widget or click the **Remove** button to delete it.

Editing a Story widget:

In the **Story** field, begin typing a student or alumni name who has a pre-prepared story or profile.
